Overview

EduCloud Server Dashboards uses Operations Manager to allow users to monitor their EduCloud Organization Virtual Datacenters. Several metrics and graphs are available to assist with capacity planning, troubleshooting, and performance monitoring.

Getting Started

Access Operations Manager through the primary menu in the HTML 5 tenant interface – bcnet.educloud.ubc.ca/tenant/org-name

Dashboards

Home

Dashboards

Overview

Organization VDC

vApps

Virtual Machines

Alerts

Alerts

Metering

Metric Selector

Reports

Overview

Gives an overview of the Org, including capacity, status and utilization

Organization VDC

Lists VDCs in your Org, with summary info

vApps

Lists vApps with summary information

Virtual Machines

Lists VMs with summary information

Alerts

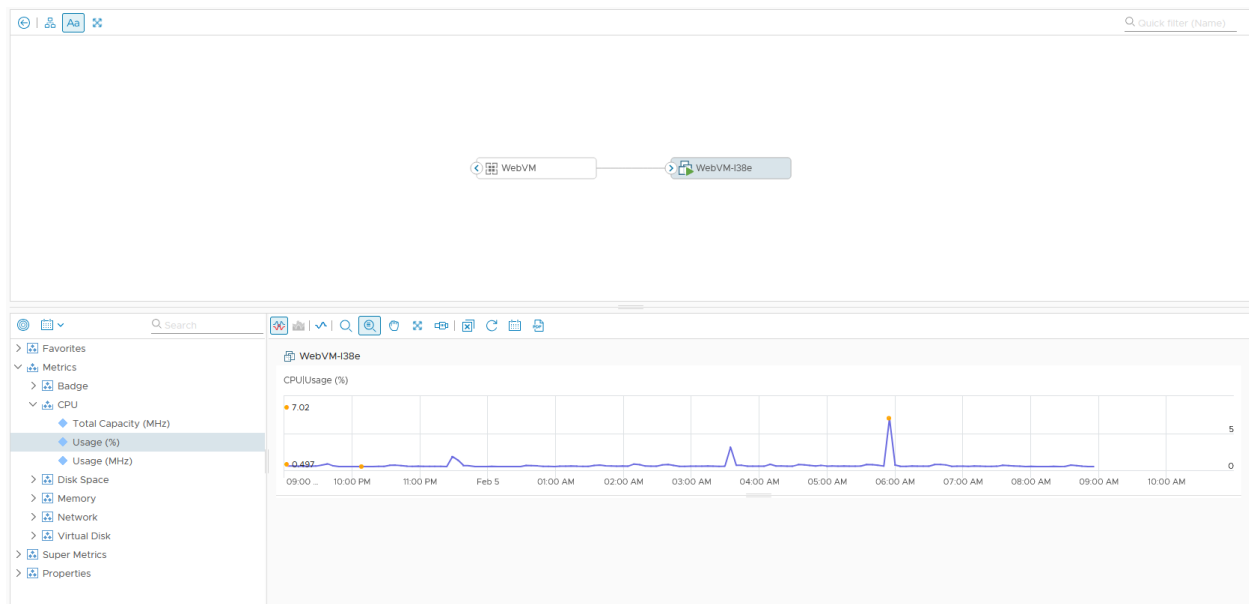

Lists Alerts. Click on displayed alert for more information.

Metric Selector

Allows finer selection of metrics.

Set filters as you wish and then select metrics.

For example:

Metering

Bills

This option is currently under development.
